

Практическое занятие № 33. Как сохранить природу?

Preface

Earth is our home. People have been living on the earth for 2mln years and in last 200 years humans have made a mess on the planet. Name the most important ecological problems.

2. Прочитайте и переведите текст с помощью словаря.

Pollution

Man has been trying to make his life easier for many centuries. In doing so, he invented machines and instruments. They have been working – and polluting the world we live in.

One of the most important pollution problems is the oceans. Many ships sail in the ocean water – fishing ships, some ships carrying people, some carrying oil. If a ship loses some of the oil in the water, or trash from the ships is put into the ocean, the water becomes dirty. Many birds and fish die because of the polluted water.

The second important problem is air pollution. Cars and factories pollute the air we use. It also destroys the ozone layer which protects the Earth from the dangerous light of the Sun.

Another problem is that our forests are dying from acid rain. This, in turn, affects the balance of nature.

If we want our children to live in the same world, we must learn to protect the water, the air and the earth from pollution.

3. Ответьте на вопросы.

1. What are the most serious environmental problems?

2. Why is it dangerous to dump industrial waste in the sea (ocean)?
3. Where does air pollution in the cities mostly come from?
4. What is the affect of acid rain?
5. What do you do to protect our Earth?

4. Определите истинность следующих высказываний.

True/False

1. People pollute the world they live in by inventing different things.
2. Fishing ships are not dangerous for the oceans.
3. People don't put trash into the oceans.
4. Many birds and fish die only because people kill them.
5. Sunlight is rather dangerous for our planet.
6. Acid rains affect the balance of nature.

5. Соотнесите выражения в обеих колонках, чтобы получились правильные предложения.

A	B
There is no ocean or sea	produce a lot of waste and pour it into rivers
Many seas are used	oxygen in the water
Many rivers and lakes	for dumping industrial and nuclear waste
Fish and reptiles	filled with chemical fertilizers and pesticides
There isn't enough	are poisoned too
Factories and plants	which is not used as a dump
Seas and rivers are	can't live in them

6. Подготовьте постеры с экологическими правилами.

1. Don't break trees.
2. Don't leave litter.
3. Keep the town tidy.
4. Respect the life and work of the countryside.
5. Keep dogs under the control.
6. Put litter away.
7. Grow trees and flowers.
8. Don't frighten birds and animals.
9. Don't cut wild flowers.
10. Don't burn fires.
